ABSTRACT

PROBLEM TO BE SOLVED: To provide a restaurant ticket issuing data processing system providing a ticket issuing machine whereby a picture, a photograph or an animation in addition to a character can be used as a merchandise display means and setting is executed from a data processing machine.

SOLUTION: The data processing system is provided with a data processing means processing an accounting and merchandise order data, the ticket issuing machine having a display selection means displaying plural merchandise and selecting ordered merchandises, and issuing tickets and a kitchen output means indicating the production of a merchandise to a kitchen. The ticket issuing machine 11, a data processing machine 12 and a kitchen printer 16 are connected by a communication line and the data processing machine 12 monitors the ticket sales condition of the ticket issuing machine 11 in *realtime* and a means which indicates display and an operation to the size and the layout of the respective merchandises which are displayed in the display equipment 11-1 of the ticket issuing machine 11 from the data processing machine 12 is provided.
